Soundtrack The soundtrack of Project 06 (a.k.a. Sonic the Hedgehog 2006 Remake) is composed of more than a half-hour of songs and also contains a number of classic themes composed of the original series. The soundtrack was released on November 15, 2016. The game's soundtrack is centered on "The Animate (Sonic 2006 Remix)", which explores a large variety of themes such as blues, jazz, indie rock, rock and dance-pop. The soundtrack includes a special remix of "Sonic Adventure" titled "Sonic Adventure (Sonic P-06 Remix)".

Contact with the Su-27s over the border appears to have begun Sunday, shortly after Russian aircraft were detected in the same region on October 8. In one case, fighters were seen dropping bombs near the border from an altitude of over 10,000ft, local reports say.

In the second instance, it seems that a pair of aircraft flew away from the border and then turned back, slowing as they approached the border. A similar pair of incidents last month left the US convinced that a Russian warplane had been based at a private airfield in the nearby Osterode district. In mid-September, after reports from several Ukrainian and western media sources that the Russians had been seen at Osterode, NATO's top military commander in Europe, General Philip Breedlove, said that the alliance was "trying to confirm the facts" about the Russians' presence in the area. A further spike in the suspicion of Russian military activity in Osterode followed the news that Russia had stepped up its air and missile defence system in the region. The Defence Ministry's statement included a reference to a "fictitious system" that allowed "fixing" or repositioning aircraft and missiles

Installation To start you need to download necessary zip file. After this you should extract it and run SonicNEXT.exe. What is SonicNEXT? SonicNEXT is a tool to open the compressed archive Sonic06.zip. If you have 32-bit Windows (7,8,8.1,10,10.1), the program works without any changes. If you have 64-bit Windows (8,8.1,10,10.1), you'll have to run SonicNEXT64.exe In order to install the Sonic2006 Project, you need: A 32-bit OS of Windows7-8-8.1-10-10.1 or 64-bit Windows 8-8.1-10-10.1 operating system .Net Framework 4.5 or higher (June 2015, Still in Beta) C++ compiler Compiled source code A.Net Framework 4.5 or higher (June 2015, Still in Beta) - [This is needed to create the "core" models] Notes Extract the archive file and run the SonicNEXT.exe program. Once you've extracted the archives, press "Next" and a dialog box will appear with the notes in the picture below. After entering the notes, press "Next" to advance to the next page and continue the installation of the Sonic2006 Project. When starting the program, please keep the following in mind: Open the SonicNEXT.exe file. Press next to continue the installation. In the Directory name field you'll have to enter the directory where you extracted the archives. In the "Model" field, please enter the name of the folder with your models (Files). In the case of Windows 64-bit, on step 5 you'll have to select the files that don't use the 64-bit version. In the "Installed OS" field, please enter the directory where the Sonic2006 Project is installed. Select "Close", then press "Finish" in order to complete the installation. Check in the "Select" field that the files and directories are in the "Installed OS" directory. After installation, close the SonicNEXT and the process ends.
